The symposium will offer a comprehensive educational program focused on the examination of evidence, case presentations and a thorough presentation of topics encountered by sports medicine professionals.

1. Discuss the diagnosis, initial treatment, and definitive management of Femoral Acetabular Impingement in athletes.
2. Explain the diagnosis and management of common psychological disorders in athletes.
3. Discuss the evaluation, diagnosis, and treatment of common traumatic abdominal injuries.
4. Identify elbow anatomy and discuss surgical technique for UCL repair in throwing athletes.
5. Demonstrate manual therapy techniques for common extremity complaints.
6. Discuss the indications and technique for kinesio taping for common complaints in athletes.
7. Apply the balance between the tissue healing and appropriate physical stress to promote restoration of functional strength and endurance to return to activity participation.
8. Compare and contrast head impact technologies in the context of sports vision and the traditional understanding of eyesight and vision.
